PROFILE

Experienced software engineering professional with 10+ years of industry experience in Java, backend development, databases and enterprise applications. Currently pursuing a Master of Information Technology at the University of Waikato in Hamilton and seeking an IT internship, graduate opportunity or part-time technology role in New Zealand. Strong background in Java, Spring Boot, REST APIs, microservices, MySQL, SQL optimisation and production support, with experience leading engineering teams and collaborating with cross-functional stakeholders. Interested in applying extensive industry experience while gaining New Zealand work exposure and contributing to software development, application support, database, technical support or other IT-focused teams.

TARGET IT OPPORTUNITIES

IT Internship | Software Development | Java / Backend Development | Application Support | Database / SQL | Technical Support

TECHNICAL SKILLS

Languages & Platforms

Java (8/14/21), SQL, HTML, CSS, XML

Databases

MySQL 5.6/5.7, Oracle; stored procedures, query optimisation

DevOps & Tools

Git, SVN, Maven, JIRA, SonarLint

Soft Skills

Team leadership, code review, problem solving, client communication

Frameworks

Spring Boot, Spring MVC, Hibernate, J2EE, JOOQ, JBoss Seam

Architecture

Microservices, RESTful APIs, DAO pattern, MVC

Servers & OS

JBoss/WildFly, Windows, Linux

Languages (spoken)

English (professional), Hindi, Gujarati

WORK EXPERIENCE

Software Architect

Aug 2025 – June 2026

Unilog Content Solutions – Bengaluru, India

- Designed and owned the architecture of the CX1 PIM platform, a large-scale B2B eCommerce product information system.
- Defined technical standards, reviewed engineering designs, and ensured compliance with quality and security requirements.
- Drove adoption of microservices patterns across teams, reducing deployment coupling and improving release cadence.
- Mentored and directed a team of 10+ engineers, establishing code-review culture and engineering best practices.

Senior Principal Engineer

Nov 2024 – Aug 2025

Unilog Content Solutions – Bengaluru, India

- Led root-cause analysis and resolution of critical production issues across multiple product lines.
- Developed Spring Boot microservice RESTful APIs and custom MySQL stored procedures for core platform features.

- Used SonarLint to enforce code quality standards; reduced code smell and vulnerability counts by a measurable margin.
- Coordinated cross-functional teams during crisis situations, minimising system downtime and safeguarding project timelines.

Principal Software Developer

Oct 2023 – Oct 2024

Unilog Content Solutions – Bengaluru, India

- Managed the full product development lifecycle from concept through deployment for key platform modules.
- Developed innovative engineering solutions that improved product performance and reliability across customer-facing features.
- Streamlined deployment pipelines, enabling faster rollouts with minimal user impact.

Senior Software Engineer

Jan 2021 – Sep 2023

Unilog Content Solutions – Bengaluru, India

- Led a team of developers in designing and maintaining the CIMM2Touch eCommerce backend platform.
- Optimised MySQL database queries, reducing data retrieval times and server load significantly.
- Reduced memory usage in existing codebases by 25%, directly improving system reliability and speed.
- Collaborated cross-functionally to gather requirements, define system functionality, and build robust software architectures.

Software Engineer

Jul 2018 – Jan 2021

Unilog Content Solutions – Bengaluru, India

- Built the presentation layer (JSF, PrimeFaces, RichFaces, HTML/CSS) for the CIMM2Touch eCommerce platform.
- Built backend application components using JBoss Seam and DAO-based architecture.
- Resolved production defects and delivered enhancements through Agile sprint cycles using JIRA.

Java / J2EE Developer

Aug 2015 – Jun 2018

Laurus Infosystems (India) Pvt Ltd – Bengaluru, India

- Developed front-end UI using JSF, PrimeFaces, HTML and CSS for Chemia and Smart MES enterprise applications.
- Implemented Hibernate mapping with Criteria, HQL, and SQL queries; applied DAO pattern throughout the data layer.
- Installed and configured software on client sites; customised products to meet specific user requirements.
- Participated in regular client-facing meetings and delivered requirement documentation.

EDUCATION

Master of Information Technology (In Progress)

University of Waikato – Hamilton, New Zealand

Enrolled 2026 | Focus: Advanced computing, software systems

Bachelor of Engineering – Information Technology

Birla Vishvakarma Mahavidyalaya Engineering College – Anand, India

Graduated 2015 | GPA: 7.61/10

ACHIEVEMENTS & AWARDS

- **Star Employee of the Quarter** – Unilog Content Solutions
- **V6 Award** – Q3 FY 2022–23, Unilog Content Solutions (performance excellence)
- **Spot Award (x2)** – Laurus Infosystems, for outstanding delivery and client satisfaction
- **Performance Recognition Award (x2)** – Unilog Content Solutions
